

# Semmco – Technical Bulletin

Technical Bulletin Number: 10-004

Date: 13<sup>th</sup> October 2010

Product Description: Semmco CSRE Live Sets

Part Number: 802.001.20

Subject: Return of Used CSRE set

## Introduction

The CSRE Live Set Part number 802.001.20 when used must be returned for Repair and revalidation.

The used sets **MUST** always be:

- ✓ Allowed to time out, let the 15 minute constant alarm sound and finish.
- ✓ Place the set without compressing the unit into a plastic bag. And then into a second plastic bag .  
Secure both bags with security tags to keep sealed
- ✓ Place the double bagged CSRE set in the approved transit box (property box labelled for CSRE packing use)
- ✓ Place the carry case with serial number that matches the used CSRE set alongside and not on top the CSRE set carry case in the transit box.
- ✓ Return the set to the regional Prison for collection.

*Extract from Trainers Power Point Presentation please refer to Notes*

### CSRE – Return

- The used CSRE must be double bagged and packaged along with its Carry Case, and returned to Semmco for rework via your approved route.

63

The set s will be returned to Semmco for refurbishment and replacement sets will be released from the regional buffer stock.

### DO NOT

- Try to use the set again
- Use as a Live training Demo set

**Note:** The sets contain a chemicals which after a period of time, absorbing the atmosphere, might leak an alkali liquid out through the generators onto the breathing bag and cause some deterioration increasing the estimated repair cost.
