New Ground Support Equipment from Semmco at Inter Airport

Semmco, Ltd has introduced three innovative, new products to its comprehensive range of specialist ground support equipment:

- ❑ The Wheel & Brake Service Cart,
- ❑ The Wheel and Brake Change Dolly and
- ❑ Lightweight modular access steps and platforms

Wheel & Brake Service Carts: A new generation of lightweight modular carts for airport and road going use, incorporating easy access loading ramps, stowage for wheels(2), trolley jack and tooling. The carts also house an onboard high and low pressure nitrogen gas supply.

Wheel and Brake Change Dolly: A new ergonomically designed wheel changer for hanger and apron use, designed to be towed, incorporating a simple and efficient loading system for manoeuvring brake pack units.

Lightweight Modular Access Steps and Platforms: Semmco has formed a partnership with **ZACHER** access and platform manufacturing to introduce a new concept in access step and platforms. These systems are of modular construction, lightweight, easy to maintain and repair and offer the long term benefit of being re-cyclable.

The specialist knowledge and experience of Semmco's engineers allows the company to tailor its products and **Engineer Solutions** to each individual Client's requirements. For more information on Semmco's extensive range of ground support equipment, you can visit www.semmco.com or email carolyn@mconieagency.com.
